Dear Dr. Swaminathan,

*Handwritten notes:*  
To Arora  
Circulate to all  
HOD & Director  
13/9/16

September 02, 2016

The Following Training Programmes sponsored by Department of Science & Technology, Govt. of India, are scheduled to be organized at IIPA. Since these programmes are going to start very shortly you are requested to kindly nominate your participants at the earliest.

S.No.	Programme	Dates	Programme Coordinator(s)	Level of Participants
1.	5 <sup>th</sup> Training Programme on "Financial Management in Scientific Organisation" for Scientists and Technologists	October 3-7, 2016	Prof. Nand Dhameja	Scientist & Technologist (All Levels)
2.	Training Programme on Science and Technology for Rural Societies	November 7-11, 2016	Prof. Dolly Arora Dr. Charru Malhotra	Scientist & Technologists
3.	16 <sup>th</sup> Foundation Training Programme for Scientists and Technologists	November 21, 2016-February 10, 2017	Prof. Dolly Arora	Scientist & Technologist, at B & C levels and equivalent
4.	6 <sup>th</sup> Training Programme on "Science, Technology and Emerging Trends in Governance" for Scientists and Technologists	February 13-17, 2017	Dr. Sujit Kumar Pruseth	Scientists and Technologists of the S & T Departments
5.	10 <sup>th</sup> Capacity Building Programme for Technical Personnel	February 20-March 3, 2017	Prof. Aasha Kapur Mehta Dr. Mamta Pathania	Technical Officer, Technical Personnel, Technician, Senior Technician, Junior Analyst

*Handwritten notes:*  
21/10/16  
15/9/16

The Institute has a Hostel where board/lodging facilities are made available to all the participants. Please note that the programmes are fully residential and accommodation is only for the participants

The Department of Science and Technology will bear the entire cost of the training organised through the IIPA. Only the expenses related to TADA of the participants for attending the training programmes at IIPA, and reporting back to their respective places of duty, are to be borne by the nominating organizations.

*Handwritten notes:*  
D7-N0730 A-11  
16/09/2016

We request you to kindly circulate this information to your scientists and staff and nominate suitable Scientists/Technologists/ Technical Personnel for the respective programmes. We would be grateful if you could kindly send your nominations clearly indicating the programme being applied for at the earliest. Since only 25 nominations would be accepted for each programme, you are requested to send your nominations at the earliest. The nominations may be sent in the enclosed format with the endorsement of the controlling officer.

With regards,

Yours sincerely,

(Dolly Arora)

## Introduction

India has accomplished significant success in varied fields of science and technology (S &T). The development effects of science and technology research as well as its applications have, however, been quite unevenly spread across the urban and rural India. The rural India, which represents almost two-thirds of the population of the country and has a distinct economic and social set up, with its distinct needs and opportunities, holds considerable promise for scientific indulgence. At the same time, specific initiatives taken by scientists and efforts made to engage with people's science movement on the one hand and to involve scientific community in addressing the rural problems and interests have invited the attention of the nation. This necessitates a more active engagement of scientists at all levels with the understanding of rural context, its problems and opportunities available for more rural society-centred science and technology initiatives. This programme seeks to attempt the same.

## Objectives

The program will expose the participants to the innovative interventions in the area of S&T, initiated by both state and civil society institutions. The intention is to engage them into creative exercises to think of new possibilities for rural development using science and technology.

In view of the above, the broad objectives of this training are:

- To expose the participants to the complex problems facing rural societies.
- To expose the participants to the existing Rural Development programmes, including those with special emphasis on S & T.
- To encourage the participants to analyse the scope for science and technology inputs contributing to improvement of development outcomes.
- To expose the participants to the indigenous knowledge systems prevalent in various parts of India and its relevance for rural society, as also, to encourage them to find grounds for an interface of modern and traditional systems for improving the outcomes.
- To examine possibilities of applications of S & T to improve development outcomes for the rural societies.

## Contents

- Rural Society: An Overview of its socio-cultural eco-system and diversity

- Indigenous knowledge systems prevalent in various parts of rural societies of India
- Case studies emphasizing science and technology innovation for Rural Development
- Challenges and Opportunities of interface of science, technology and rural societies

### **Methodology**

The programme will use Case Studies, lectures as well as brainstorming of innovative ideas generated through Group/panel discussions. Apart from IIPA faculty, distinguished guest speakers would include eminent experts from academia, scientific community, civil society organizations and government organizations. A local field visit to examine some initiatives in the area would also be organised to provide first-hand experience of the subjects under consideration.

### **Duration**

One Week Residential

### **Aim**

To enable the Scientists and Technologists acquire skills, knowledge, techniques and attitudes to face the contemporary and future challenges.

### **Venue**

Indian Institute of Public Administration, New Delhi.

## OBJECTIVE

The success of every organization highly depends upon the sound management of financial resources (i.e. 'Financial Management'). Financial management is of paramount importance particularly to those organizations which involve huge funds like scientific organizations, research institutes etc. In this reference the present program attempts to familiarize the participants with some critical financial issues like financial statements, sources of finance, cost control, budgeting, financial appraisal of projects etc. The primary objective of this program is to enable the participants to plan their financial resources and make their best possible use. It attempts to develop a fair understanding of different concepts of financial management to ensure better use of funds.

## CONTENT

- Financial information flows and financial reporting
- Analysis of financial statements
- Accounting for depreciation
- Valuation of intangible assets
- Planning for financial inflows
- Cost: Allocation and Control
- Budgeting: Cash budgets and Zero base budgeting
- Project Formulation and financial appraisal

## METHODOLOGY

There will be a blend of theory and practice. Suitable numerical exercises, relevant case studies will be used along with the interactive discussions & lectures.

## COURSE CONTENT AND METHODOLOGY

The Twelve week Foundation Training Programme for Scientists & Technologists is designed to provide the young scientist a holistic view of the Inter-relationship between Science, Society and Development. The significance of Socio-political, Cultural and Economic issues in management of science and technology will be examined in depth and detail. An attempt will be made to develop behavioral and problem solving skills. At the same time it will prepare the participants for future senior positions which will require not only technical but also administrative skills. The various components of the programme include lectures, panel discussions, workshops as well as field visits. The **Urban and Rural Field Visits** will provide them an opportunity to examine ground realities.

The focus of the programme would be to enable the participants to:

- Evaluate the symbiotic relationship between Science; Technology and Development.
- Examine the nature of relationship between the State, Civil Society and Market and their emerging roles in facilitating good governance.
- Appreciate the contemporary challenges confronting scientists and administrators in handling issues concerning Environment and Sustainable Development.
- Apply some of the good practices used in other organizations in implementation of S&T Policy.
- Prepare S&T projects for funding by the concerned departments.
- Acquire necessary behavioral skills for solving problems and overcoming difficult situations in work place.
- Comprehend administrative rules and procedures required for dealing with related Ministries, Departments and Organizations more effectively.
- Apply the basic concepts of Financial Management and Budgetary Control.
- Appreciate the relevance of legal framework pertaining to S&T.
- ICT-enabled Knowledge Management.
- Apply ICT-enabled Processes of Governance for improving public service delivery systems, Information Security, IPR/Copyright and Ethical issues.
- Evaluate the role of technology in Urban and Rural Development.

**Note: On successful completion of the Foundation programme, the Participants are taken on a Foreign Study Tour by DST.**

The programme aims to provide an in-depth analysis of the complex process of governance, involvement of various institutions and the civil society. The participants can comprehend the various issues and challenges of good governance which will enable them to strategize their role in ensuring good governance.

In brief, the objectives are to facilitate the participants to:

- Get a comprehensive understanding of the concept of governance and its importance in contemporary times.
- Comprehend the complex process of interface of science and technology and governance.
- Acquire necessary skills for facing the challenges posed by sweeping changes in governance.
- Appreciate the process of making governance citizen centric.
- Envision the role of scientists and technologists in strengthening governance and democratic structure of the country.

## OBJECTIVES

Capacity building is a process of strengthening the abilities of individuals / organizations to perform core functions sustainably. The goal of capacity building program is to enable the participants to tackle problems more effectively. Keeping this broad objective in mind, this two week program aims at providing broad overview of financial management, project management and general management. Realizing the specific job requirements of technical personnel, the program will also give exposure of some relevant acts (like IPR, Patent, RTI etc.) and attempt to enhance the potential of participants in writing reports, drafting cabinet notes and making presentations.

## CONTENT

The broad areas to be covered under the program are as under:

- Team building and Motivation
- Communication Skills and Interpersonal Relations
- Financial Statements and their analysis
- General Financial Rules
- Inventory Management
- Total Quality Management
- Project Management
- Economic appraisal of Projects
- Knowledge Management
- IPR/ Patents / Copy Right
- RTI and its implementation
- Conduct Rules and Disciplinary Procedure
- Rate Contract and e-procurement
- Drafting Cabinet Notes
- Report writing and presentations

## METHODOLOGY

The methodology of the training program will be a mix of interactive sessions with eminent scientists, administrators, guest faculty and faculty of IIPA. The emphasis will be on case studies, group exercises, management games and field visits.
